## **V. M. Dandekar Memorial Symposium**

### **V.M. DANDEKAR MEMORIAL SYMPOSIUM – 1<sup>st</sup>**

### **March, 2023**

**A packed auditorium on the day of the Symposium, with more than 300 attendees**

**All the organizing team members of the symposium**

### **Report of Event**

#### **Dr. Sudhir Waghmare (Keynote Speaker)**

Dr. Sudhir Waghmare, our chief speaker, gave an inspiring speech on his journey in the electro-medical industry. He spoke about how he persistently pursued his dream of becoming an engineer, which led him to study electrical engineering despite having a commerce degree.

Dr. Waghmare shared that he was the first person to manufacture electric heating pads in India in 1983. He then started working on life support devices for newborns, which his company now sells internationally and has offices in several SAARC countries. He also discussed his invention of a human milk pasteurizer, which was the first of its kind in the world and received recognition from doctors from several countries.

Dr. Waghmare also spoke about his battle with oesophagus cancer, which did not deter his passion for the electro-medical industry. He emphasized the need for talent and passion, as just talent is not enough to be successful; one must also have a positive attitude.

After his cancer procedures, Dr. Waghmare went to several hospitals to establish his technology. During the COVID-19 pandemic, he was convinced by top officials in Pune and top doctors from around the country to produce ventilators. He went ahead with his design, which was up to the mark, and received an order for 2000 ventilators. These ventilators are still working in 2023.

Dr. Waghmare's speech was truly inspiring, and we learned how his passion and perseverance led him to the top of his field. We realized that passion beats every obstacle that is put in our way, and we should never give up on our dreams. Overall, it was a wonderful experience to hear from such an accomplished speaker, and we are grateful for the opportunity to learn from his wisdom and experience.

#### **Mr. Prince Tiwari**

#### **Topic: Indianisation of The Education System and Qualities of Life Management and Leadership in Ramayana**

Mr. Prince Tiwari, founder of The School of Ram and convener, is also editor in chief of Migrating Magazine. His main motive is to spread the ideology among the youngsters and their surroundings to understand our culture in depth and enhance the value of education. He commenced his speech with a verse in Sanskrit language and explained its meaning to all alongside the importance of Hindi language.

He started with the New Education Policy, which aims to transform India into a vibrant knowledge society and global knowledge superpower. He compared today's education system to the education system in the past with various examples and verses. Mr. Prince then spoke about the 64 kalas [arts] and 14 vidyas [techniques] of ancient India, which included the 4 Vedas, 4 UpaVedas, and 6 Vedangas, which shows our immense and intricate Vedic tradition.

He then talked about Bhagwan Dattatrya and his 24 Gurus, in which he considered that "Nature is the greatest Teacher".

Everything in nature teaches us something important, be it the changing of the seasons, the flow of water, the bee or the flowers or small insects etc. He then explained about the book “Hidden Science in Hanuman Chalisa,” which revealed the distances between the sun and earth. These all show the aptness and vastness of Indian knowledge tradition.

Traditional knowledge is important to the integrity of a community. He mentions the importance of mother tongue in education. Mother tongue is the language that a child gets to hear after birth and that helps in giving a definite shape to our feelings and thoughts. A mother, a mother tongue, and a homeland—these three things play an important role in everyone’s life. He termed English an unscientific language.

Many of the words in English like three, mother, right, etc. are derived from Sanskrit words. Then, to make us deeply understand the importance of our mother tongue, he showed a heart touching video in which a little girl said that it was not possible for her to write down her dreams in English because she had never seen a dream in English. He then puts the spotlight on the importance of relationship management by giving the beautiful example of Lord Ram and Sita.

The ideology of Lord Rama can be applied in every sphere of life. Even the emotions of India represent the vibe of Lord Rama. He says that the ideology of Rama is so inspiring that we can pursue it as a base to educate the ethics and mindset of India.

Mr. Tiwari then concluded his session by saying that it is not sufficient to build just temples, but it is also necessary to spread the spiritual thoughts, cause-and effect relationships, ways to tackle problems, and a lot more knowledge that can be achieved by enhancing the quality of research regarding the ideologies of Lord Rama.

### **Adv. Maitreyee Bapat**

#### **Topic: International Law and Youth Empowerment**

Adv. Maitreyee Bapat, a highly accomplished legal professional, an animal activist and is handling marketing and social media platform of corporations. With a background in economics, law, and international relations, she possesses a dynamic knowledge of every aspect of international relations and foreign affairs.

She started her talk with the definition of youth which was the highlighted point in her entire speech. According to the UN, youth is the population between the ages of 18 and 24, but to her, it is a broader term which refers to the transition phase when people are transitioning from being dependent on others to being independent. This perspective provides young people with more opportunities to explore.

She adopted a conversational and interactive tone throughout the talk, which made the topic relatable to the audience. Even the audience was largely made up of young people; her message became more relevant as a result. She used Canada and Japan as excellent examples of nations that lack youth power to underline the value of this resource. These countries lack the youth to advance the economy ahead whereas India has a huge potential and can become the next global power by effectively utilizing this invaluable asset.

The speaker emphasized that the youth and international laws are interconnected and impact each other. Youth is already a part of these laws as seen through the institutions - Office of the High commissioner for Human rights (OHCHR), United Nations Office on drugs and crime.

(UNODC), 17 SDGS as well as India's National Youth Policy 2021 working to empower young people through various initiatives. International laws are set of rules, treaties and agreements that are binding between the countries and made with collaboration of nations for the benefit of citizens.

Even the constitution, foreign policy, visa, and migration rules work on the principle of international law and youth is affected by it in some or the other way. She cited a very prominent example of Rescue operation Ganga which brought back the Indian students (Youth power) from Ukraine during the Russia-Ukraine war. It was only possible due to good international relations between Russia and India.

The session was concluded with a powerful message that the youth of this 21st century are the change-makers who can play a vital role for the betterment of society by being aware of the issues and actively participating to resolve them.

**Mr. Sushrut Waghmare**

**Topic: Finding Opportunities in Times of Distress**

Sushrut Waghmare started his speech by sharing that his first performance was on the same stage in 2006, and if he could go back in time, he would tell his younger self to recognize the opportunities that life presented to him. He emphasized that we often pass by various opportunities that could change our lives, but lack the awareness to capitalize on them.

He then shared a personal story of his love for football and how he had always wanted to play in a league. He got the opportunity to play in a big game once, but during a practice match, he suffered a serious knee injury that tore three ligaments in his right knee. This setback created a fear in him that he would never be able to play again, and he struggled with anxiety, self-doubt, and procrastination.

Despite his injury, he tried to go back to playing football but kept falling down and experiencing more pain. He began to think that maybe football wasn't his calling and that life was trying to tell him something. However, a turning point in his life came when his father asked him to join the family business, even though Mr. Sushrut was initially reluctant and wanted to hang out with friends and party. He decided to give it a try, and over the past 3 and a half years, he has taken over the business and is proud of his accomplishments.

Sushrut's story shows that setbacks and obstacles can be opportunities for growth and learning. Even though he faced a major setback with his knee injury, he was able to find success and fulfilment in a different field. It's a reminder that success is not just about achieving big accomplishments but also about taking small steps towards our goals and keeping an open mind to new opportunities.

## **Feedback Report**

### **Session 1 - 10:45am to 11:05am**

#### **Keynote Speaker - Dr. Sudhir Waghmare**

52.4% of people found it outstanding, implying that this was the second-most loved session of the symposium. 35.1% of people found it excellent. 172 attendees found the session useful. This indicates that the speaker's speech about the importance of passion definitely had an impact on the audience.

### **Session 2 - 11:15am to 11:40 am**

#### **Esteemed Speaker - Mr. Prince Tiwari**

Participants absolutely loved this session. 53.7% of people, that is 176 people, rated it as outstanding and 32.6% found it excellent. Quite impressive when compared to the rest. The speaker's communication skills moved the audience.

### **Session 3 - 11:45am to 12:10pm**

#### **Esteemed Speaker - Adv. Maitreyee Bapat**

36.9% of people found her session outstanding and 33.2% found it excellent. This implies that 121 students found it outstanding, which is approximately 50 students lesser than the first two sessions, resulting in a 28% decrease. This is a significant drop. The session could have been better.

### **Session 4 - 12:15 pm to 12:40pm**

#### **Esteemed Speaker - Mr. Sushrut Waghmare**

This was the last session of the day. This speaker was the son of the first speaker, Dr. Waghmare. 37.2% of the participants found the session outstanding while 32% found it excellent. The response to this session was almost the same as the second last session of the day.

Overall, 142 out of 328 attendees rated the Symposium a 5 out of 5 followed by 128 attendees who rated it as 4 out of 5. This is impressive feedback as only 20% of the students have rated it 3 or below. Dr. Sudhir Waghmare sir and Mr. Prince Tiwari sir stole the show.

The first two sessions gained 53% outstanding feedback whereas during the last two sessions, it dropped to 37%. A reason behind this could be the restlessness of the audience. All the esteemed speakers performed brilliantly and had the audience engaged most of the time. However, as the event went on, the attendees perhaps could not concentrate resulting in the significant difference in feedback.

When asked if the students would be interested in attending such symposiums in the future, 232 out of 328 people voted for Yes. This indicates that our audience is always keen to learn and experience more and that the V.M. Dandekar Memorial Symposium 2023 was a huge success.

### Suggestions

The students expected to receive 5-minute breaks between the sessions. Sitting for 4 hours straight was difficult for some students. Apart from this, most students were quite satisfied with the event.

### Key Takeaways

- Believing and focussing on one's passion is the key to success.
- Education isn't received, it is achieved.
- The importance of Indianisation of education as well as the importance of perseverance.
- Power of youth in today's world.
- Awareness towards climate change and innovation.
- Importance of development of mental growth.
- Always follow your passion and focus on improving your skills and knowledge. It doesn't really matter which degree you're pursuing. What matters is your knowledge and interest.
- Hindu religious books and stories teach us a lot of real-life lessons and even give knowledge related to subjects like Physics, business, management, etc.
- Significance of mindset and determination.

## FINANCIAL AWARENESS SESSION – 13<sup>th</sup> February, 2023

**All the organizing team members and attendees of the session**

**Keynote speaker, Mr. Abhishek Somani**

**Report of Event**

On February 13, 2023, the Department of Economics and Banking and the Symbiosis Centre for Skill Development at the Symbiosis College of Arts & Commerce, in collaboration with Global Synergizers, organized a session on 'Financial Awareness.' The event began at 10 a.m. and was held in the college's Auditorium in the presence of the Principal, Dr. Hrishikesh Soman, the Head of the Department of Banking and Finance and the Head of the Centre for Skill Development, Prof. (Dr.) Neelofar Raina, the Resource Speaker, Mr. Abhishek Somani, and Ms. Sunanda Shivhare from Global Synergizers. It was open to all faculty members and students, and a big audience had gathered to watch it.

The speaker, Mr. Abhishek Somani, talked about various aspects of financial awareness. He started the session by emphasizing the importance of financial independence and taking control of one's financial future. He then explained the importance of knowing one's financial and saving goals and suggested that individuals should reflect on what gives them real happiness to determine their financial goals.

Mr. Somani also shared insights from the book 'Rich Dad Poor Dad' by Robert Kiyosaki and discussed the Cash Flow quadrant and the concept of "Pay Yourself First". He then provided tips on how to choose the right companies to invest in and explained the benefits of investing. He also discussed how to choose the right investment instrument and highlighted key points to avoid risks.

The session ended with a Q&A session, where the audience was able to ask questions and clarify their doubts. The event was a great success, and the participants appreciated the insights and practical tips provided by Mr. Somani to enhance their financial awareness.

## SKILLMANTHAN – November 9<sup>th</sup> and 10<sup>th</sup>, 2023

**A panel discussion on day 1 with the alumni guest speakers**

## Day 2 – Skills Unleashed

### Report of Event

#### Day 1 – 9<sup>th</sup> November, 2022

The event started off with a bang with a short introduction by Skill Ambassadors Rutuja Patole and Pratiksha Malavadar. They also acknowledged the principal, Dr. Soman Sir and Dr. Tessy ma'am for their gracious presence. They also introduced the guest speakers of the day Krutasha Ramanuj and Arjun Pradhan to all of the excited First Year students. Subsequently, all the dignitaries went onstage for a short lamp lighting ceremony, and Vaishnavi performed a beautiful rendition of Ganesh Vandana.

Dr. Hrishikesh Soman sir then addressed everyone and wished all the bright First year students the best of luck. Following this, Krutasha shared her insights regarding skills and also talked about the many different types of skills, her understanding of what skill development meant and her experience with Neelofar ma'am and the Symbiosis Centre For Skill Development. She gave a lot of illuminating insights about how skills are necessary for success, as in the working world, skills are a form of currency. When done correctly, skill development can reduce un- and underemployment, boost productivity, and raise living standards. She encouraged students to improve and update their skills in order to help them financially.

Because the world is constantly changing and evolving, new discoveries in industries and the way people live are made almost every day. Employees and professionals may be left behind if they do not convert. Students can grow not only professionally but also as individuals by learning new skills. Skills can help students improve themselves. They also provide them with new and different opportunities. Students can grow by developing themselves and their skill

sets. It was an extremely informative and illuminating conversation and helped the new first year students tremendously.

Preceding this, another college alumnus, Arjun Pradhan, who is now a successful lawyer, shared his valuable insights about why skills are extremely important in everyday life. He used many examples from his everyday work life to drive his points across and helped the students understand his subject matter using practical life experiences. He mentioned how learning new skills like investing, soft skills, etc can help the students in the future, while looking for jobs, or even if they decided to start their own businesses. He was successfully able to connect with the audience and drive his points across, which made the session very insightful.

Subsequently, both the chief speakers had an insightful panel discussion, which was hosted by CSD Student Head Prithvi Girish and Skill Ambassador Rohan Dutta. They asked Mr. Arjun and Ms. Krutasha questions, and both the speakers engaged in healthy discourse in front of the students regarding their opinions and how they believed learning skills and participating in the Centre for Skill Development had helped them in their personal and professional lives.

After this, all the skill ambassadors together introduced and launched all of the Skill Courses, and the forms were opened for all of the first years to take admission in the course of their choice. Dr. Neelofar ma'am also informed the students that the guest speakers would be teaching two of the courses. The session concluded with a brief story of how for the Symbiosis Centre for Skill Development had grown in leaps and bounds in all these years.

## Day 2 – 10<sup>th</sup> November, 2022

Day two of Skillmanthan started off with a short introduction about The Centre for Skill Development and all the achievements of its students, as well as a brief description of the events conducted so far. SCSD teaches students about skills that are relevant to them using live sessions and giving them practical exposure. This helps students stand out. Another thing that makes SCSD courses different from other courses is the fact that they provide students with never seen before industry ready programs like the Smart Investor Program or SIP. After this, CSD Student Head Prithvi Girsh gave a short introduction about CSD, and about how its aim is to bridge the gap between industry and academics by helping students develop specific skills of a high order.

Following this, Dr. Neelofar Raina ma'am, head of CSD, addressed all the students who were present there. She thanked all the students for attending the session. She talked about how CSD was conceived and how the students could greatly develop themselves by taking admission in the various skill courses. She told the students about the importance of skills and why skills matter, and even students presented their opinions on the same. Dr. Neelofar also introduced all of the Skill Ambassadors and talked about their contributions, skills and achievements.

The Skill Co-ordinators then presented the various Skill Courses and also the Jeevan Kaushal Courses, which are very unique and not available in many other colleges and universities. The Skill Ambassadors then talked about various different skills. Rohan Dutta talked about Content writing, and the importance of content writing in everyday life. Yousuf Kazi gave a touching performance and informed the students about how acting gives people skills that are otherwise underappreciated. Prithvi talked about blogging, and also promoted his financial blogging site, where he regularly posts informative content.

Sidharth talked about an extremely important topic, the Internationalization of education, and how it affected India, its population and the education sector. Rutuja talked about volunteering

and NGOs and also about her personal experience working with them. Priyanshu conducted an entertaining session about gaming, which was a big hit with the Gen Z students.

Vinita then presented Skills Unleashed, and she also talked about her debut book. The event ended with a vote of thanks by Hruchidnya. In the feedback that was taken from students after the session, a majority of the students agreed that the session conducted was very helpful to them and was also very useful in accordance with Skill Development. Most students also had an excellent overall experience and showed willingness to participate in future sessions and become members of CSD in the future.

### **Report of the event**

DAY 1

**Dr. Nipun Vinayak**

*(Chief Guest)*

Dr. Nipun Vinayak, IAS 2001 from the Maharashtra cadre, after securing an MBBS with gold medals from the Government Medical College. He is presently serving as the Joint Secretary, Department of Health and Family Welfare.

Our respected Chief Guest shared his vision that focus should be on the objective of integrating skill sets in educational programmes. With appropriate and relevant skill sets and training programmes, educational institutes will be capable of creating a powerful asset. According to him, one should focus on quality learning and strive towards excellence.

He enlightened us with a prominent perspective that learnings should go beyond teaching; our exposure to unique and uncommon ideas will inculcate values and instill the courage in us to go further in search of knowledge. Dr. Vinayak also shared with us his belief that learning can be promoted only when we experience the same. Delivering his views, he emphasized that we must adopt the competition to collaborative approach. He said that this step is only possible when the educator teaches the future pillars of our country, the Youth, about how to learn and how to stay curious. His words had a profound impact on all of us. What he highlighted in his video message was something very relevant and all attendees could relate to in the present times. It had a very strong message that we have been chasing better grades for all these years and not eternal knowledge for that matter.

#### DAY 1

#### **Mr. Arun K. Jadhav**

*(EQ and Behavioral Skills)*

Mr. Arun Jadhav, an educator based in Pune, specializes in mentoring students in the skills of emotional quotient, personality, and leadership skills. He added that he had over a decade of experience in leadership development and human resources.

He claimed that, at any cost, we need to remember two days– the day we were born and the day we realize why we were born. According to him, it is imperative to know the reason behind our birth since that can prove to be a driving force behind our lives. Having trained over 50,000 individuals over the span of 10 years, he stressed how important the skill of emotional

intelligence is, claiming that it can change our entire life: what we think about ourselves, our relations and everything.

He stated that he used to work for a consultancy firm, recruiting the best. Eventually, he found that despite landing an extremely profitable job, those he recruited would mostly leave in around five years. Stumped! He reached out for answers. He discovered that even for companies such as Google, many employees would leave the organizations for jobs with lower salaries, smaller companies, or even a completely different profile. He then reached the same conclusion as Simon Sinek, that do not hire for skills, but hire for attitude because one can always teach them skills. The realization dawned on him that in looking for the crème de la, instead of chasing passion, he was running after finding skills. Next time onwards, before testing for technical skills, priority was given to first test the candidate's psychological capital, shortened to HERO: Hope, (self)Efficacy, Resilience, and Optimism.

When Mr. Jadhav first learned of emotional intelligence, he was so surprised that he began questioning his 20 years of formal education. He discussed how disappointed he was that no one had ever taught or discussed the importance of these skills. He recalled how a friend once said that one of the biggest mistakes one could make is to let schooling interfere with one's education.

He took the road less traveled and gave up his well-paying job to learn all that he could about EQ, teach it to other people, and in his way, make the world a better place. He added, humorously, that this decision made his parents try to disown him, but this has not stopped him from doing what he wants. Mr. Jadhav concluded with the remark that we are either the 2% in the world doing what we want or the other 98% working for the 2%.

## DAY 1

### **Dr. Milind Bokil**

*(Social Impact Assessment and Evaluation)*

Dr. Milind Bokil, a noted sociologist, writer, freelance consultant and researcher. He has also been a consultant for notable organizations like the European Commission, UNICEF, World Bank, UN Women etc and thus, the stage of Symposium was humbled by his presence.

To start from the very basics, Dr. Bokil focused on the term impact. He explained that the word, Impact, is derived from physical sciences. He stressed that developmental interventions or projects would necessarily produce the desired change. But the impact can be positive or negative, intended or unintended. He further discussed that social impact is the enduring change one can observe in the social and economic conditions, incomes, livelihoods, relationships, and aspirations.

Then Dr. Bokil diverted his attention to the Assessment of Impact. He explained that while planning the project, setting objectives takes place, and the desired change gets conceptualized. His next topic for concern was Evaluation, which determines the value of a given project or intervention. To ensure audience interactions, he hypothesized a case of Social Impact Analysis, wherein one had to analyze the impact of constructing a dam. Collecting Project Information is the first step where one needs to ponder the technical details, objectives, cost-benefit projections, and beneficiaries to evaluate the necessity and the relatability of building a dam. The next step involves preparing a study design where economic, social, and ecological dimensions are to be kept in mind. Preparing a methodology based on the study design is the third stage.

Dr. Bokil further discussed that assembling the team is the fourth step. People from different dimensions, like Economists, agricultural economists, statisticians, Economics, Sociologists, anthropologists, social activists, and others come together to give meaning to the data. Actual assessment, fifth step, wherein literature review, documentary analysis, review of reports, sample surveys, data collection, and risks are analyzed and sent for final report preparation. One then needs to prepare the report, followed by communicating the results. This riveting session ended after he opened the platform for further questions. Though the topic was complex, the breaking down of the concepts helped the audience to comprehend and participate in further deliberations.

## DAY 1

### **Ms. Meenu Sood**

*(Is Communication Really Complicated?)*

Ms. Meenu Sood is the director of Value Point Academy, and she has extensive experience teaching communication skills to students and professionals. She gave an informative talk titled 'Is communication really that difficult?' She brought up a significant reason for communication becoming difficult in today's times- miscommunication.

She explained the statement in detail by giving some real-life examples, such as a 1977 plane crash that killed hundreds of innocent lives owing to miscommunication. Ms. Sood helped us in understanding the term communication by defining it in simpler terms. She said that the exchange of ideas, information, and emotions through speech, writing, body language, and technology is known as communication. According to her, the impossible part of communication is not communicating. This means that in every single wakeful moment of our life, we are communicating either by way of body postures, gestures, or facial expressions.

Listening skill, speaking skill, thought process, and body language is essential for effective communication. Speaking skills involve extensive knowledge, correct pronunciation, and grammar. She also advised against using fillers and to effectively coordinate the mind and tongue. A good speaker must have fluency, correct pitch, clarity, and voice modulation. Moving on to the next section, listening skills, Ms. Sood explained the importance of effective listening and advised students to listen twice as much as they speak. She explained the different types of listening: ignoring, pretending to listen, selective hearing, attentive listening, and empathetic listening. She also discussed the listening technique of 'LADDER,' which includes 'look at other people, ask questions, don't interrupt, don't change the subject, express emotions with control and respond appropriately.' Ms. Sood discussed body language and how it creates chemistry between the speaker and the listener. She advised us to pay attention to three aspects of body language: facial expressions, gestures, and posture. She added that smile is the universal language. This was followed by a case study where she focused on the thought process, which is an important part of communication. She mentioned that the thought process is useful for making decisions, managing time, setting SMART goals, and improving interpersonal and interactive skills. She also discussed a case study that piqued students' minds and engaged them in a practical thought process. She concluded her session by mentioning Indra Nooyi's 5Cs of success, which are namely competency skills, courage and confidence, communication skills, consistency skills, and compass.

DAY 1

**Ms. Megha Pradhan**

*(What is Social Impact Evaluation – Procedures and Dimensions)*

Megha Pradhan, an alma mater of the University of Maryland, who is in association with NITI AAYOG for various training projects, was another fabulous speaker for the day. She is the Associate Director of Training at J-PAL South Asia.

She started her lecture by discussing how 96% of children aged 6 to 14 are in school, yet, only a quarter of class 3 children could read grade one level texts. She then presented a problem to the audience, wherein we had a total of 10 crore rupees and had to invest it in one of the facilities to increase the quality of education in government schools. The options included a range of facilities such as free books, tablets, better food and nutrition. After about 230 rigorous evaluations, it showed that not a single facility is impactful by itself- but a mix of all is needed.

She then explained through these examples that there are multiple perspectives on the same topic, and choosing between the available options is extremely difficult, because we must be able to know the true impact they can have on the problem. Thus, this highlights the decision makers' dilemma: limited resources, many challenges but many solutions.

She proceeded to give a brief introduction to J-PAL, which started in 2003, at MIT, to ensure that policies are based upon evidence, facts, and scientific methods. She then discussed that four essential steps are to be followed for formulating a successful intervention. Firstly, conduct a need assessment to know what a policy is trying to solve. Then, design the program and build a theory of change where with trial and error, it is to found why a specific input changes the output. This step is followed by the implementation and conduction of process evaluation and then ultimately estimating the impacts made. This last step is the cause-and-effect portion that social impact analyzers are supposed to study.

Ms. Megha then concluded her session by highlighting how evidence is the key to good quality policy-making and that it is quite the scientific discipline.

## DAY 2

**Mrs. Vaishali Bhagwat**

*(Knowledge of Cyber-Legal Skills in Higher Education)*

Mrs. Vaishali Bhagwat is a renowned advocate by profession having 24 years of experience in litigation and advisory practice. She imparted her knowledge on cyber legal skills and how one can make a career in it.

Initially, she started with how there is a sudden shift in the approach toward educational policy in today's era. Back then, attaining a specialization was restricted to one stream since the entire life was predictable. Today, the whole world revolves around uncertainty, and when technology started overpowering our lives, the need for cybersecurity came into the picture.

She had put forward her views that now the era has changed where the youth is now a generalist rather than a specialist in one single stream. For her, a generalist has acquired more than one skill and has the freedom to choose any avenue. She talked about how we took everything for granted before Covid-19 and the multidisciplinary approach, now, is going to help us in our survival, otherwise we will become stagnant in our life. According to her, we should focus on what will augment our domain knowledge. It will help us to bridge the gap between our domain knowledge and learning methodology. In the year 1998, she got her license for Information Technology Act, enacted in 2000, enabling her to combine her domain knowledge with what she was learning. She also talked about the advantage of getting a mentor who provides insight on several matters. She described her phenomenal journey from getting into tech to the non-tech field.

Numerous career options in cyber security have opened doors for various avenues for us. One can take up a career in Law under which one can go through the legal aspects of cyber law. Fintech is the need of the hour. Cyber Audit will help us to build a concrete career in auditing firms. Data privacy can be monetized to generate decent revenue for a firm.

Thus, cyber security skill is something that can help us to grow up fast in our career. Numerous avenues will be open in which one can cater to several legal firms and can develop a concrete as well as comprehensive career.

## DAY 2

### **Mr. Jayant Tambade**

*(Reskilling and Upskilling in BFSI Sector)*

The topic for Mr. Tambade's talk was upskilling and reskilling in the BFSI sector, which stands for Banking, Financial Services, and Insurance.

The session started with an interesting video about the evolution of banking, followed by an emphasis on why specific skills have replaced general skills in the BFSI sector. According to Mr. Tambade, the sector has emerged as one of the smartest career options available today.

He then asked the students about the key to succeed in life, noting how knowledge, skills, and attitude will help the students in leading successful lives. The aspects of reskilling and upskilling were also touched upon under the importance of skills, as being up to date and leveling up on the skills one possesses is crucial.

Mr. Tambade then spoke about the potential the Banking sector has in India, a country with a popularity of over 1.3 billion people, a number that will only increase in the future. Great insight was provided by the speaker on how important it will be for the banking sector students to adapt themselves to the technology of the future, as online banking services are soon going to take over.

The career options such as Investment Banker, Analyst, Commercial Banker, Customer Relationship Manager, and more were also provided by Mr. Tambade to help students figure out their career paths. To achieve these lofty goals, the skills that were required would be time management, Communication, Adaptability, Problem-solving, and Teamwork.

To end his talk, he focused on banking in the future and how it will be shaped by those who are prepared for this change.

DAY 2

**Ms. Sapna Karia**

*(Product Management Skills)*

Ms. Sapna Karia is the proud recipient of the 'Most Inspiring Woman Award' in 2019, who has presented and published around 13 national and 5 international papers. She talked about the topic of product management skills. She initiated the talk with an activity where she asked students to count the number of downloaded applications on their phones. She bursted the myth that product management requires technological know-how and said that we need not be an engineer to enter into this field. Product management is a stream under integrated management regardless of the financial orientation of the person or the person dealing with international business. Every problem in society that is trying to be solved by businesses is called product management.

Consumer behavior has changed with the period, and they have become lazy. There has been a technological upgradation in the market, beginning from the traditional way of buying and selling to E-Commerce to multichannel to omnichannel. She mentioned the example of Urban Ladder and Lenskart starting their business from e-commerce and later shifting to multichannel because of consumer behavior. Businesses and entrepreneurs need to understand what societal problem they are trying to solve and then decide the channel of selling their products to the consumers. The sequence is different for each & every product or service in the market. She took the example of Dominos to answer why mobile phones are necessary for businesses today. She mentioned how Dominos changes its mobile application at periodical intervals for more customer engagement. She said that for businesses, it is important to update their product according to the needs of present times. Product management is all about building the right product and building the product right. She explained how product management and project management are two different terms on their own. Project management is a short-term skill that one can develop by organizing any college function, fest, others. On the other hand, product

management is an ongoing process that won't stop after a deadline. She noted how customer behavior changes according to the high and low involvement of the brands and corporations. She said if the applications downloaded on phones are not getting used, there is less involvement and interaction, and the need to change the level of involvement for improvisation arises. In the end, she showed the video of an advertisement for BMW and said the product is observing and knowing people better. The best skill to understand the customer is to analyze his behavior.

## **DAY 2**

**Dr. Joachim Griesbaum**

*(Knowledge, thinking, motivation as basic conditions for information literacy)*

Dr. Joachim Griesbaum, who works at the University of Hildesheim's Institute for Information Science and Language Technology is the first among the foreign professors to give a lecture at this chapter of the Symposium.

He started his session by discussing information literacy, which he explained was required in both education and private life. Dr. Joachim highlighted that we need information literacy as it is one of the most demanded skills in this age- we need it to be competent professionals, and successful students, and to be able to research and use relevant information during times of crisis. He said that we need information literacy to be resilient to manipulation, such as in e-commerce or politics. If we can use information literacy to our advantage, we can resist forces trying to take advantage of us.

He mentions how the internet is an infrastructure, a place of media, and algorithms. It is a complex, interest-driven, and partly transparent information space. Factors such as dominant players in information and communication markets, the fake news industry, and invisible algorithms all obstruct the user from learning the right information. By relying on sources offered by big companies, we must be aware that these companies all have their agendas and interests.

He said that many users lack the readiness and capability to behave in an information-literate manner. Users avoid effort, resorting to typical patterns of search engine behavior. He goes on to discuss the exact details that make up information literacy, including knowledge about information markets, limits of human information behavior, critical thinking, and motivation to get to the bottom of things.

Dr. Griesbaum explained a process known as 'Lateral Thinking', which followed the idea of using the knowledge of trusted third parties to evaluate information. The session ended with Dr. Griesbaum stressing how we must be information literate or at least try to inculcate the skill to be resilient against manipulation.

DAY

2

**Prof. Thomas Mackey and Prof. Trudi Jacobson**  
(*Developing a Metaliteracy mindset: Benefits for yourself, Employers and Society*)

The penultimate speakers of the second and final day of the Symposium were Prof. Thomas Mackey and Prof. Trudi E. Jacobson. The address was on metaliteracy, and was delivered online.

Metaliteracy is the ability to evaluate information for its bias, reliability, and credibility and apply them in the context of production and sharing of knowledge. The speakers emphasised the importance of possessing a metaliterate mindset, how to develop it and its benefit to ourselves, our employers and society. Skills which are to be required to future-proof our employability were said to be cognitive, interpersonal, self-confidence and digital.

Apart from this, the speakers focused on soft skills valued by employers like personality, attitude, flexibility and more. They said that it is crucial to develop learners as those willing to learn will always be an asset to any organisation. The speakers spoke about how true reflection by one will lead to action required in life.

They explained the concepts like Learning Domains in Meta-literacy, Soft skills, and their Metaliteracy Counterparts. An activity was conducted to find whether one is a Metaliterate Learner or not. At the end, the speakers focus on how a metaliteracy mindset will be realised through true-learning.

**DAY 2**

**Ms.**

**Vaishali**

**Phatak**

Valedictory

Address

*(Industry Academia Linkages and Skilling for Higher Education)*

The valedictory address was conveyed by Ms. Vaishali Phatak, the global head of Learning and Development, Diversity and Inclusion with Tech Mahindra.

Ms. Phatak spoke about Industry-Academia linkages and skilling in higher education. Starting from the pedestal of contemporary challenges in front of the industry, she moved on to the measures undertaken. She advised students that to stay relevant, they must advance themselves and try adapting and responding to technological advancements, business models, consumer behaviors, and the changes in the entire industry scenario as a whole. Ms. Phatak introduced students to Tech Mahindra's Maker's Lab, an initiative to inculcate current trends and relevant knowledge to professionals, trainees and students. She said, "Innovation arises from imagination, to decipher the problems faced by the human race." She also mentioned that the objective of Tech Mahindra is to boost innovation within the company.

She also discussed the numerous opportunities available to students and how students can specialize in domains such as data, operations, logistics, finance, and consulting. The speaker emphasized the significance of knowing at least one programming language to improve analytical skills. Ms. Phatak then told the audience about BHAMAL, a drone-agritech company founded by Satish, a taxi driver. She explained to students that one's background does not determine success. She also advised them how to break through the glass ceiling and succeed.

The speaker then listed some important soft skills that students must have and how failing to have them results in job and other application rejections. She then instructed students to conduct research on what skills are currently in demand in the industry and to learn those skills through higher education. She emphasized industry-academia linkages and partnerships through Memorandums of Understanding with Universities, Research Sponsorship, Lab

# SYMBIOSIS COLLEGE OF ARTS & COMMERCE

Reaccredited 'A+' with 3.51 CGPA For Third Cycle By NAAC | College with Potential for Excellence

Setups, and Internship Opportunities to keep the syllabus up to date and students skilled. Ms. Phatak also asked students to look into some online courses and how they would benefit from the learnings; she told them that they could earn while they learn. By doing so, Ms. Phatak demonstrated to students the significance of skilling, re-skilling, and cross-skilling.

## Feedback Report

### Day 1

#### Session 1: Mr. Arun K. Jadhav

#### Topic: EQ and Behavioural skills

Q1. How educative or impactful was the session for you?

Q2. How useful was the session in accordance with Skill Development?

44.2% of people found it outstanding, 42.8% of people found it excellent. Overall people loved his session. 129 participants felt that the session was needed and was in tandem with Skill Development. This indicates the importance of the session and the topic chosen by the speaker.

## Day 1

### Session 2: Dr. Milind Bokil

#### Topic: Social Impact assessment and evaluation

Q1. How educative or impactful was the session for you?

Q2. How useful was the session in accordance with Skill Development?

38.5% of people found his session good and 31.7% found it excellent. 74 participants felt that the topic selected was contemporary in accordance to Skill Development. However, it could have been better.

**Day 1**

**Session 3: Ms. Meenu Sood**

**Topic: Is Communication Really Complicated?**

Q1. How educative or impactful was the session for you?

Q2. How useful was the session in accordance with Skill Development?

Participants absolutely loved her session. 47.1% of people, that is 98 people, rated it as outstanding and 38% found it good. Quite impressive when compared to the rest. 139 students found the session needful.

**Day 1**

**Session 4: Dr. Megha Pradhan**

**Topic: What is Social Impact Evaluation - Procedures & Dimensions**

## SYMBIOSIS COLLEGE OF ARTS & COMMERCE

An Autonomous College | Under Savitribai Phule Pune University  
Reaccredited 'A+' with 3.51 CGPA For Third Cycle By NAAC | College with Potential for Excellence

Q1. How educative or impactful was the session for you?

Q2. How useful was the session in accordance with Skill Development?

Her session was marked as outstanding by 17.8% participants and 42.3% rated it good. Since her session was online, it was much less interactive than the other sessions. Thus, the audience was unable to focus.

How was your overall experience of the National Skill Symposium 2022 Day 1?

Overall, 101 out of 208 people rated Day 1 of the National Level Skill Symposium as excellent, which is decent feedback. Mr. Arun K. Jadhav and Ms. Meenu Sood stole the show. Their sessions were incredibly interactive and the students clearly enjoyed attending them. As for the other two speakers, they could've put more effort into making it interesting to grasp the audience's attention.

## Suggestions:-

The students expected more Q&A sessions as well as more games and interaction from the speakers. Most of them did not enjoy the online lecture. They hope to attend more sessions from lecturers like Arun Jadhav sir. A five to ten minute break between the lectures would've helped the students concentrate better.

## Day 2

### Session 1: Adv. Vaishali Bhagwat

#### Topic: Knowledge of Cyber-Legal Skills in Higher Education

Q1. How educative or impactful was the session for you?

Reaccredited 'A+' with 3.51 CGPA For Third Cycle By NAAC | College with Potential for Excellence

Q2. How useful was the session in accordance with Skill Development?

Prof. Joachim sir's lecture was conducted online from Germany. His session was quite insightful and 90 and 83 out of 249 students rated the session as excellent and good respectively. 110 students found it useful.

**Day** **2**  
**Session 5: Prof. Thomas Mackey and Prof. Trudi E. Jacobson**  
**Topic : Developing a Metaliteracy mindset: Benefits for Yourself, Employers and Society**

Q1. How educative or impactful was the session for you?

## SYMBIOSIS COLLEGE OF ARTS & COMMERCE

An Autonomous College | Under Savitribai Phule Pune University

Reaccredited 'A+' with 3.51 CGPA For Third Cycle By NAAC | College with Potential for Excellence

Q2. How useful was the session in accordance with Skill Development?

The second last session of Day 2 was quite an interesting one. The speakers tried their best to keep the audience engaged with fun little quizzes and surveys. 2 online polls were conducted and the students enjoyed being a part of it. The feedback revealed that 87 out of 249 students found it excellent and 76 found it good.

**Day**

**Session**

**6:**

**Ms.**

**Vaishali**

**2**

**Phathak**

**Topic: Industry Academia Linkages and Skilling for Higher Education**

Q1. How educative or impactful was the session for you?

## SYMBIOSIS COLLEGE OF ARTS & COMMERCE

An Autonomous College | Under Savitribai Phule Pune University

Reaccredited 'A+' with 3.51 CGPA For Third Cycle By NAAC | College with Potential for Excellence

Q2. How useful was the session in accordance with Skill Development?

This was the last session of the day and Ms. Vaishali ma'am's lecture was the perfect way to end the day. Out of 249 students, 90 students rated it excellent and overall 125 students found it useful.

How was your overall experience of the National Skill Symposium 2022 Day 2?

Overall, 111 out of 249 students enjoyed the skill convention. The event was a success. From the individual feedback of all the speakers, we can conclude that the participants found the offline sessions much more engaging and interesting. The first three sessions of the day were

absolutely amazing. However, the two online lectures did not receive much appreciation when compared to the rest.

### **Suggestions:-**

The students expect more interactive sessions. Physical presence of the speaker makes a huge difference. They were also hoping to get a 5 to 10 minute break between each session since 6 sessions in one day is difficult to handle. Apart from this, they wanted more time to network with the guest speakers.

### **Key takeaways from the Skill Symposium 2022:**

- Amazing insights on product management and its need today whether you are an engineer or just an employee.
- Insightful event whereby students learnt new skills and developed perspective regarding various skills vital for survival in corporates.
- Being jack of all trades is much better and catching the opportunity when it presents itself is utmost important.
- Observation is key. Always use your eyes and ears to their limit. Skills will prevent your career from becoming obsolete.
- Emotional intelligence is as important as skill development. Cyber security is an upcoming sector for a good career.
- There is scope of diversifying in all fields

### **Identifiable things people liked in the program:**

- Interactive session with amazing speakers.
- Well organized and coordinated event; thoroughly knowledgeable and enhanced the previous understanding of complex subjects.
- Impactful speeches with the focus on soft skills and the significance of learning coding.
- Brainstorming sessions with the idea of giving gifts to encourage participation.
- There was dissemination of the most recent trends and requisites in BSFI, Product management. Metaliteracy and Information literacy sessions also incentivised to develop critical thinking.
